Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

1. Group I - Figures 1-6
2. Group II - Figures 7-12
3. Group III - Figures 13-15

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 3616

2. The claims are deemed to correspond to the species listed above in the following manner:

Claims 1, 2, and 3 are drawn to Group I;

Claims 2 and 7 are drawn to Group II; and

Claim 4 is drawn to Group III.

The following claims appear to be generic: 5 and 6

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: While it is true that the species share the common feature that they are airbag vent hole closing mechanisms, this is not a special technical feature, since air bag vent hole closing is old and well known in the art and the manner in which they do this is completely different from each other.

In Group I, the vent closing is done by the cloth-like piece (9).

In Group II, the vent closing is done by a combination of the first tether (28), the second tether (27) and the cloth-like piece (9).

In Group III, the vent closing is down by a combination of extension cloth (31) and the rectangular cloth-like piece (30).
